

What is claimed is:

1. An emergency wallet size identification pouch comprising:
an envelope with information on both sides thereof descriptively identifying a human;
a DNA source specimen of said human in said envelope, and
a clear laminate sheath encasing said envelope and said DNA source specimen.
2. The emergency pouch of claim 1 wherein said envelope is sealed.
3. The emergency identification pouch of claim 2, wherein said DNA source specimen may be removed from said envelope upon said sheath being cut at a predetermined end thereof; and
4. The emergency identification pouch of claim 1, wherein said information identifying said human includes a photograph and fingerprints of said human.
5. The emergency identification pouch of claim 1, wherein said information identifying said human is legibly imprinted in multiple languages on said envelope.
6. The emergency identification pouch of claim 1 wherein said DNA source specimen is hair of said human.
7. The emergency identification pouch of claim 1 wherein said DNA source specimen is saliva of said human.
8. An emergency wallet size identification pouch comprising:
an envelope, having two sides on which information is entered identifying a human;
a DNA source specimen in said envelope; and
a clear laminate sheath enclosing said envelope and
an end on said laminate sheath which when cut provides an opening permitting removal of said envelope from said laminate sheath.
9. The emergency identification pouch of claim 8 wherein said DNA source specimen is hair of said human.

10. The emergency identification pouch of claim 8 wherein said DNA source specimen is saliva of said human.
11. The emergency identification pouch of claim 8, wherein said information identifying said human includes a photograph and fingerprints.
12. The emergency identification pouch of claim 8, wherein said information identifying said human is legibly imprinted in multiple languages on said envelope.
13. A method for making a wallet size emergency identification pouch comprising:
 - printing information on envelope descriptive of an individual human;
 - placing a DNA source specimen of said human, in said envelope,
 - sealing said envelope,
 - encasing said sealed envelope in a clear laminate sheath.
14. The method of claim 13, wherein said information descriptive of said human includes a photograph and fingerprints.
15. The method of claim 13 wherein said DNA source specimen is hair of said human.
16. The method of claim 13 wherein said DNA source specimen is saliva of said human.
17. The method of claim 13, further comprising providing a marking on said sheath along which said sheath may be cut to facilitate the extraction of said envelope from said plastic sheath.
18. The method of claim 13, further comprising printing said information in multiple languages.
19. A process for identifying an individual human comprising:
 - imprinting information descriptive of said individual human on an envelope;
 - placing a DNA source specimen of said human, in said envelope;

sealing card envelope;
encasing said sealed envelope in a clear laminate sheath;
removing said envelope from said laminate sheath;
removing said DNA source specimen from said envelope and
comparing the DNA contained in said DNA source specimen with that of DNA samples
taken from an unidentified human to determine whether or not the DNA of said unidentified
human matches said DNA of said DNA source specimen removed from said envelope.

20. The process of claim 18, wherein said laminate sheath has a marking on which it is cut to
permit removal of said envelope from said laminate sheath.
